THE INTERNATIONAL PRELIMINARY EXAMINING AUTHORITY

PCT

To: Hamann, Arndt SAURER GmbH & Co. KG Landgrafenstrasse 45 41069 Mönchengladbach GERMANY		NOTIFICATION OF TRANSMITTAL OF INTERNATIONAL PRELIMINARY REPORT (Rule 71.1 PCT) Date of mailing (Day/month/year) 04.05.2005
Applicant's or agent's file reference	IMPOR	RTANT NOTIFICATION
WS 2241.1 PCT	T 4 Al al Clina data	Priority date (Day/Month/Year)
International reference No.	International filing date (Day/Month/Year)	
PCT/EP2004/010368	16.09.2004	16.10.2003
Applicant SAURER GMBH & CO. KG et al.		

- 1. The Applicant is hereby notified that this International Preliminary Examining Authority transmits herewith the International Preliminary Report on patentability and its annexes, if any, established on the International Application.
- 2. A copy of the report and its annexes, if any, is being transmitted to the International Bureau for Communication to all the elected Offices.
- 3. Where required by any of the elected offices, the International Bureau will prepare an English translation of the report (but not of any annexes) and will transmit such translation to those offices.

4. REMINDER

The Applicants must enter the national phase before each elected Office by performing certain acts (filing translations and paying national fees) within 30 months from the priority date (or later in some Offices) (Article 39(1)) (see also the information sent by the International Bureau with form PCT/1B/301).

Where a translation of the International Application must be furnished to an elected Office, that translation must contain a translation of any annexes to the International Preliminary Report on patentability. It is the Applicant's responsibility to prepare and furnish such translation directly to each elected Office concerned.

For further details on the applicable time limits and requirements of the elected Offices see Volume Π of the PCT Applicant's guide.

The Applicant's attention is drawn to Article 33(5), which provides that the criteria of novelty, inventive step and industrial applicability described in Article 33(2) to (4) merely serve the purpose of International Preliminary Examination and that "any Contracting State may apply additional or different criteria for the purposes of deciding whether, in that State the claimed invention is patentable or not" (see also Article 27(5)). Such additional criteria may relate, for example, to exemptions from patentability, requirements for enabling disclosure of the invention and clarity and support for the claims.

INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY

International Application No. PCT/EP2004/010368

Box No	. 1	Basis of the report
l. languag	With rege in w	egard to the language, this report is based on the International Application in the hich it was filed, if nothing different is stated under this point.
		The report is based on a translation from the original language into the following language, which is the language of the translation, which has been filed for the following purpose:
		 □ international search (according to Rules 12.3 and 23.1b) □ publication of the international application (according to Rule 12.4) □ international preliminary examination (according to Rules 55.2 and/or 55.3)
invitati	omont	regard to the elements* of the international application, the report is based on sheets which have been furnished to the receiving office in response to an ler Article 14 are referred to in this report as "originally filed" and are not annexed:
Descri	ption,	pages
2-5		in the originally filed version received on 15.03.2005 with the communication dated 11.03.2005
1, la		received on 13.03.2003 with the commandation dated 17.03.200
Claims 1-9	s, No.	in the originally filed version
Drawi 1/3-3/3	ngs, sh	in the originally filed version
□ listing	a sequ	ence listing and/or any related tables - see supplemental box relating to sequence
3. 🗆	The au	mendments have resulted in the cancellation of:
J		Description: page
		Claims: No.
		Drawings: Sheet/Figs.
		Sequence listing (specify): any tables relating to the sequence protocol (specify):
	_	
4. 🗆	and li	report has been established as if (some of) the amendments annexed to this report sted below had not been made, since they have been considered in the opinion of athority to go beyond the disclosure as originally filed, as indicated in the emental box (Rule 70.2 c)).
		Description: page
		Claims: No.
		Drawings: Sheet/Figs.
		Sequence listing (specify): any tables relating to the sequence listing (specify):
* If Ite	m 4 ap	oplies, some or all of the sheets may be marked "superceded".

Form PCT/IPEA/409 (January 2004)

INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY

International Application No. PCT/EP2004/010368

Box No. V Reasoned statement under Article 35(2) with regard to novelty, inventive step and industrial applicability; documents and explanations supporting such statement

1. Statement

Novelty (N)

Yes: Claims 1-9

No: Claims

Inventive step (IS)

Yes: Claims 1-9

No: Claims

Industrial applicability (IA)

Yes: Claims 1-9

No: Claims

2. Documents and explanations (Rule 70.7):

see supplementary sheet

INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY (SUPPLEMENTARY SHEET)

International Application No. PCT/EP2004/010368

Item V

1. Prior art

The following documents are cited:

D1: DE 100 26 389 A1 **D2:** US-A-3 303 698 **D3:** JP 02 221427 A **D4:** JP 06 128821 A

2. Technical area

The invention relates to a method for determining the diameter and the length of the effects of a yarn.

- 3. Novelty and inventive step (Article 33(1), (2), (3) PCT)
- 1. The subject of **Claims 1 to 9** is novel for the following reasons and is based on an inventive step:
- 2. Document **D1** is regarded as the closest prior art. This document discloses that the beginning and the end of an effect are defined by meeting a first and a second diameter criterion. The effect length is determined from this beginning and end. A diameter average is formed with the aid of the values in the effect area.
- 3. The method according to **Claim 1** differs from **D1** in that a specifiable number of the largest diameters is determined between the beginning and end and in that the average is formed from these largest diameters determined. This average is specified as the diameter of the effect.
- 4. The problem is thereby solved of determining the effect diameter independently of natural diameter variations in the effect area.
- 5. A diameter determination of this type of effects is not known from any of the available documents (D1 to D4), nor is made obvious by them. D1 does mention that the number of maximums and minimums in certain sections of the diameter signal are used, but only to allow a comparison with pattern signals. No mention is made of an average value formation with the aid of these maximums and minimums.

INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY (SUPPLEMENTARY SHEET)

International Application No. PCT/EP2004/010368

- 6. The Claims 2 to 9 are dependent on Claim 1 and therefore also meet the requirements of the PCT with reference to novelty and an inventive step.
- 4. Industrial applicability (Article 33(1), (4) PCT)

 The present invention is undoubtedly industrially applicable.
